

To Whom It May Concern:

I am writing to ask for a stoplight to be installed in the Town of Dayton on State Road 38 at the intersection with Dayton Road.

This area is on my daily route and that intersection has become increasingly problematic. The turn lanes on 38 help with the flow of traffic, but do not solve the problem. The intersection needs a stoplight.

Please consider this beyond the traffic studies you have done because they do not adequately tell the story. Those of us who use this intersection can speak to the need for a stoplight.

Thank you for taking another look at this intersection.

Yours Truly,
