

Dear Sir or Madam,

Dayton needs a stoplight at 38 and Dayton Road for many reasons, including safety and efficiency. The town has been working on improving the streets and sidewalks in town, but one improvement that's badly needed the town cannot do. We need INDOT to do this for us.

It's dangerous at times for Dayton's many walkers to cross 38. A stoplight at the intersection of 38 and Dayton Road with a "walk" enhancement would make this much safer.

A stoplight is especially needed to make the traffic flow more efficient. It's often difficult and dangerous to turn onto or cross 38. Many times during the day cars are lined up both north and south from the intersection, and people who live on 38 find it difficult to get out of their drive.

Please do for Dayton what Dayton can't do for itself but would if we could. We really appreciate your time and consideration.

Sincerely,
